21st of June 2017, Granada

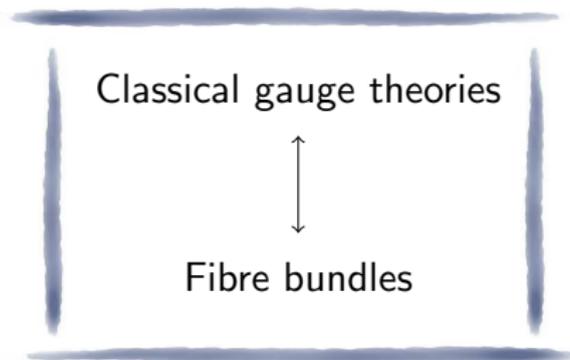

Topology and Freezing

Open-Boundary Conditions in Space

Switches

Some Topology

Some Topology

Classical gauge theories

Fibre bundles

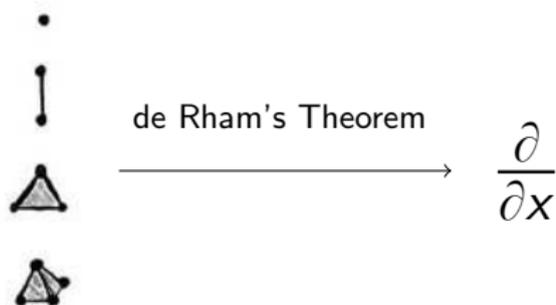

Can be 'twisted'!

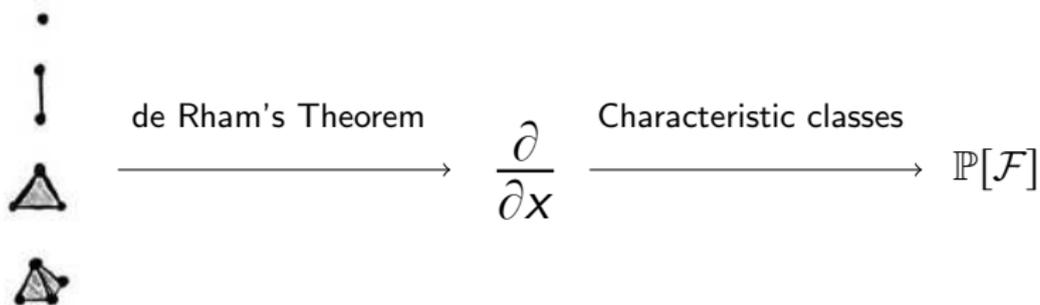

Cohomology and Classification

Cohomology and Classification

Cohomology and Classification

Cohomology and Classification

$SU(N)$ bundles in $4D$ \longleftrightarrow 2^{nd} Chern class:

$$q = -\frac{1}{8\pi^2} \mathbf{Tr}(F \wedge F)$$

Cohomology and Classification

$SU(N)$ bundles in $4D$ \longleftrightarrow 2^{nd} Chern class:

$$q = -\frac{1}{8\pi^2} \mathbf{Tr} (F \wedge F)$$

Topological charge: $Q = -\frac{1}{16\pi^2} \int_M F_{\mu\nu} \tilde{F}^{\mu\nu}$

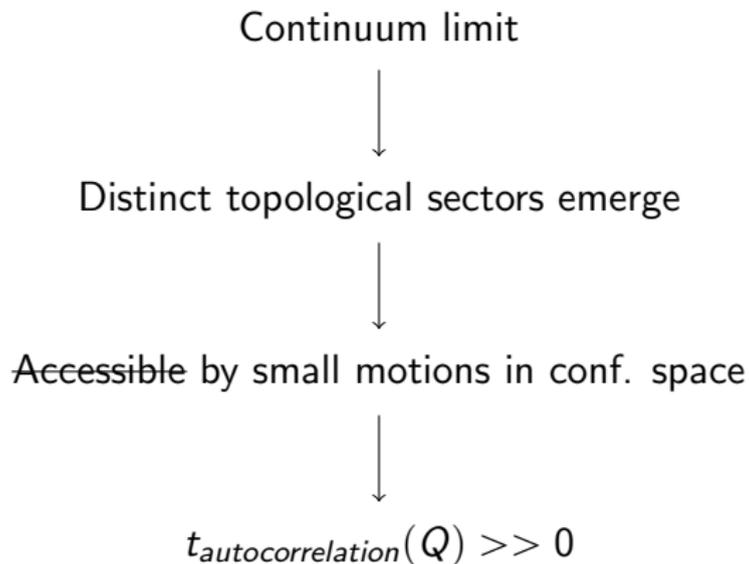

Remarks

- For compact spaces $Q \in \mathbb{Z}$
- For non-compact spaces $Q \in \mathbb{R}$
- **Continuum** story

Refs: [Avis,Isham 1978] [DeWitt,Hart,Isham 1979]

Topological Freezing

Topological Freezing

Continuum limit

Distinct topological sectors emerge

Accessible by small motions in conf. space

$$t_{\text{autocorrelation}}(Q) \gg 0$$

A Solution: OBC

Remarks

- For compact spaces $Q \in \mathbb{Z}$
- For non-compact spaces $Q \in \mathbb{R}$
- **Continuum** story

Refs: [\[Avis,Isham 1978\]](#) [\[DeWitt,Hart,Isham 1979\]](#)

A Solution: OBC

Remarks

- For compact spaces $Q \in \mathbb{Z}$
- For non-compact spaces $Q \in \mathbb{R}$
- **Continuum** story

T⁴

Refs: [Avis,Isham 1978] [DeWitt,Hart,Isham 1979]

A Solution: OBC

Remarks

- For compact spaces $Q \in \mathbb{Z}$
- For non-compact spaces $Q \in \mathbb{R}$
- Continuum story

Refs: [Avis,Isham 1978] [DeWitt,Hart,Isham 1979]

Thermal Simulations, Open Boundary Conditions and Switches

\mathbb{T}^4
↓
Open-up the torus!

A Solution: OBC

[Luescher, Schaeffer 2011]: $F_{0\mu}(x)|_{x_0=0} = F_{0\mu}(x)|_{x_0=l_0} = 0$

$$\begin{array}{c} \downarrow \\ T \neq 0 \end{array}$$

Spatial OBC: $F_{i\mu}(x)|_{x_i=0} = F_{i\mu}(x)|_{x_i=l_i} = 0$

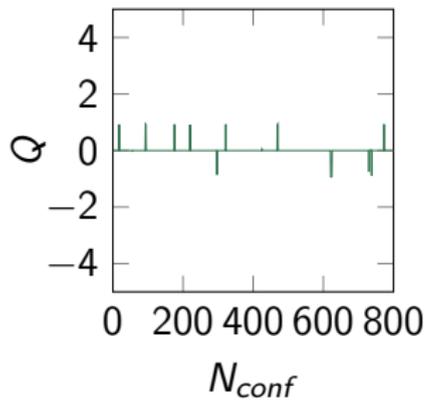

A Solution: OBC

[Luescher, Schaeffer 2011]: $F_{0\mu}(x)|_{x_0=0} = F_{0\mu}(x)|_{x_0=l_0} = 0$

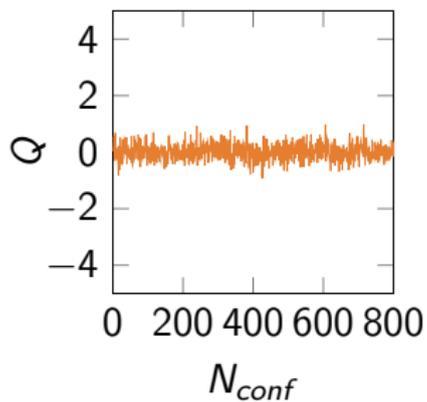

Spatial OBC: $F_{i\mu}(x)|_{x_i=0} = F_{i\mu}(x)|_{x_i=l_i} = 0$

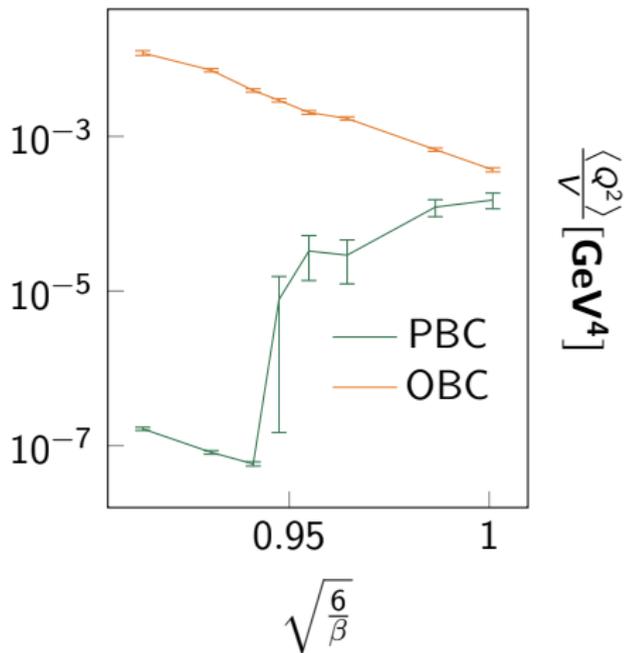

PBC

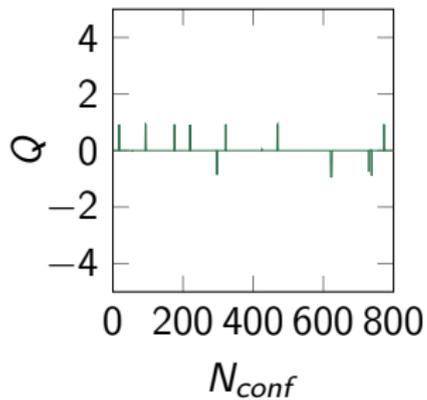

OBC

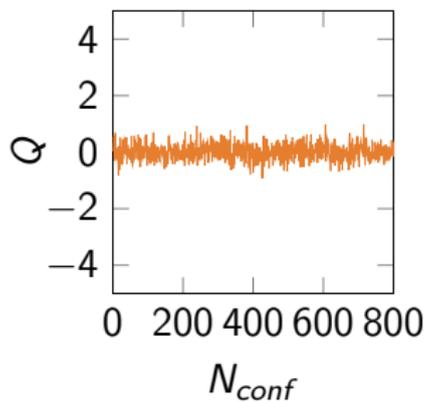

$T \approx 1.28 T_c$

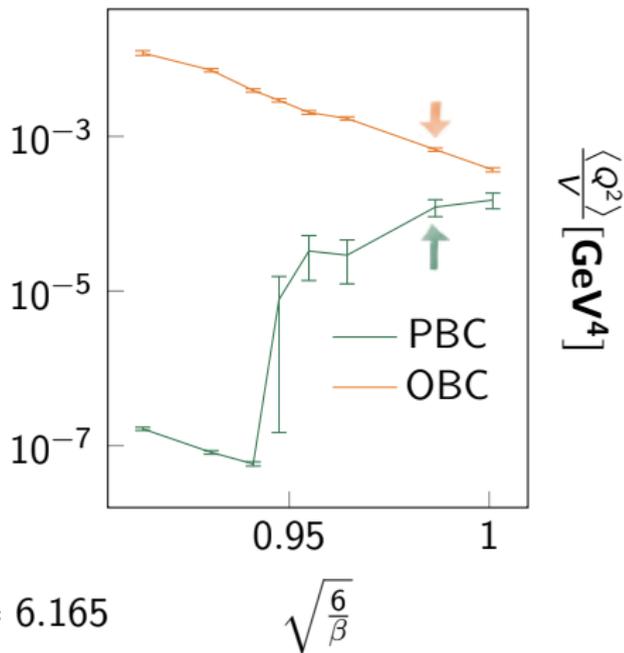

PBC

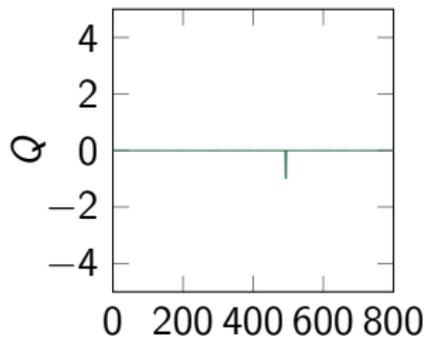

OBC

$T \approx 1.28 T_c$

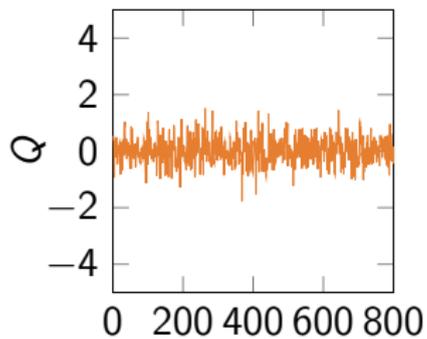

PBC

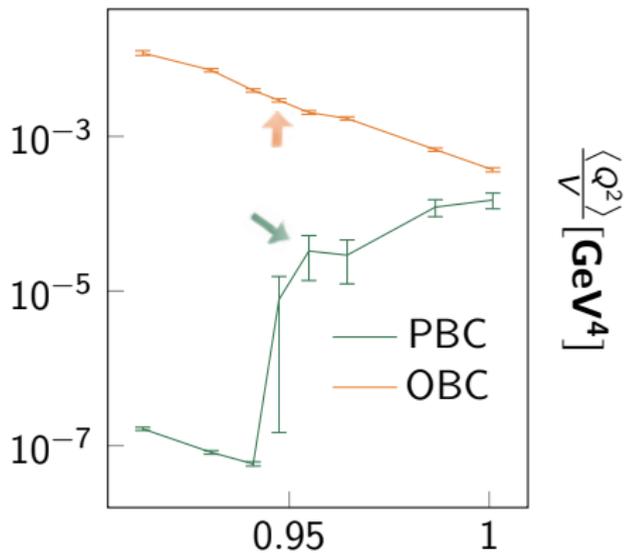

N_{conf}

OBC

N_{conf}

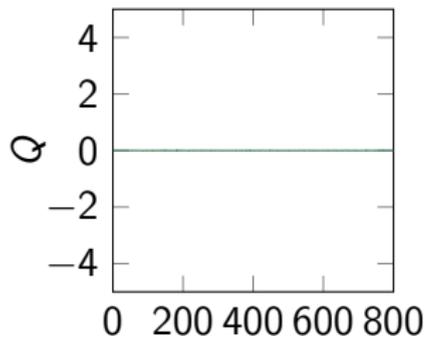

$T \approx 1.28 T_c$

$\beta = 6.580$

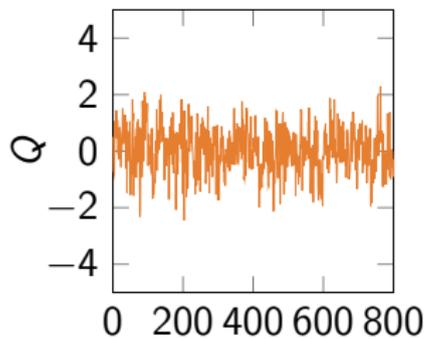

$\sqrt{\frac{6}{\beta}}$

PBC

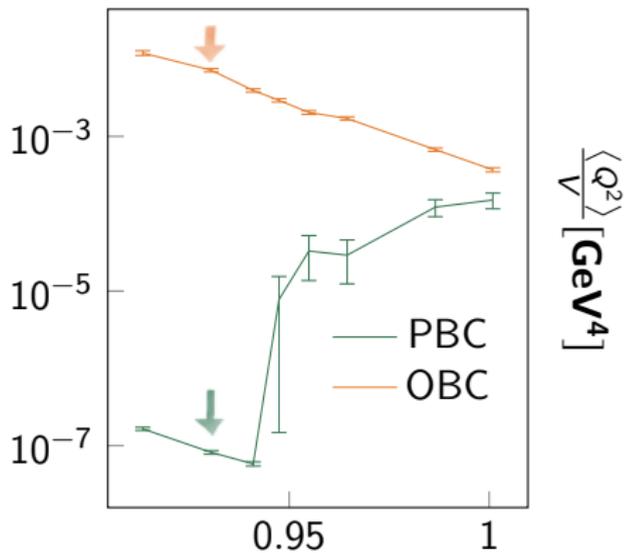

N_{conf}

OBC

N_{conf}

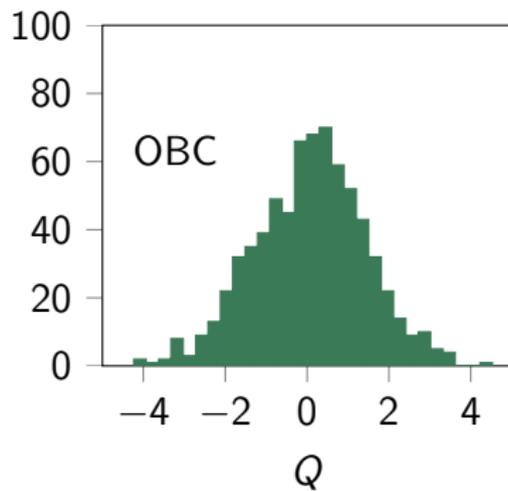

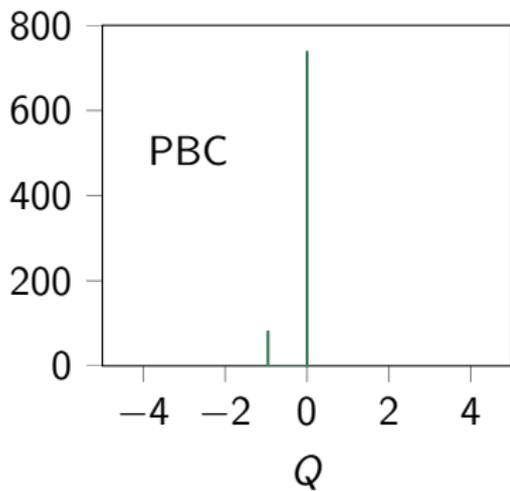

$T \approx 1.28 T_c$

$\beta = 6.930$

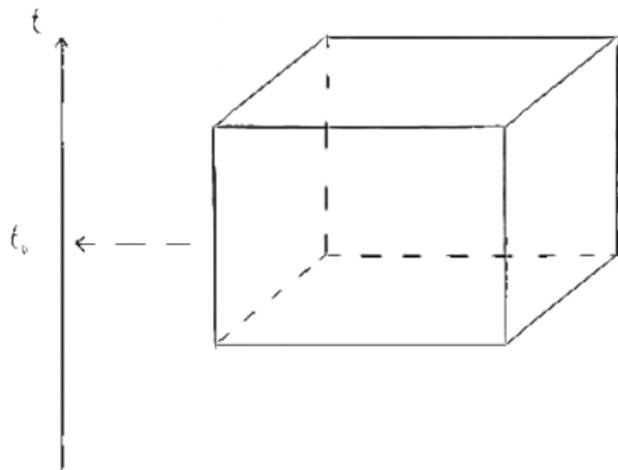

$\sqrt{\frac{6}{\beta}}$

$32^4, \beta = 6.872, T \approx 0$

Finite Size Effects

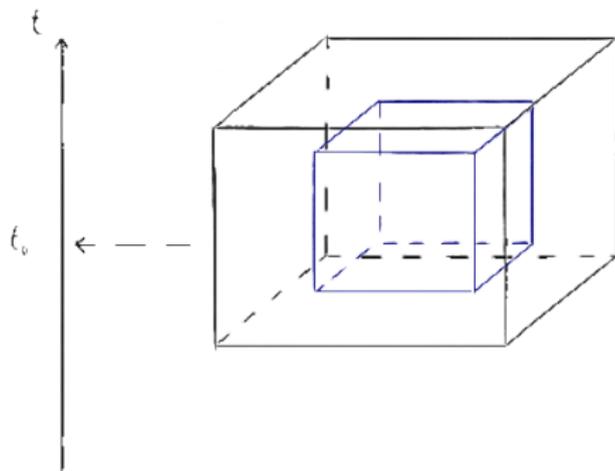

$$V_s = L_s^3$$

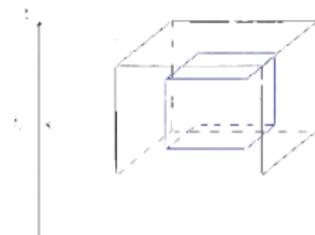

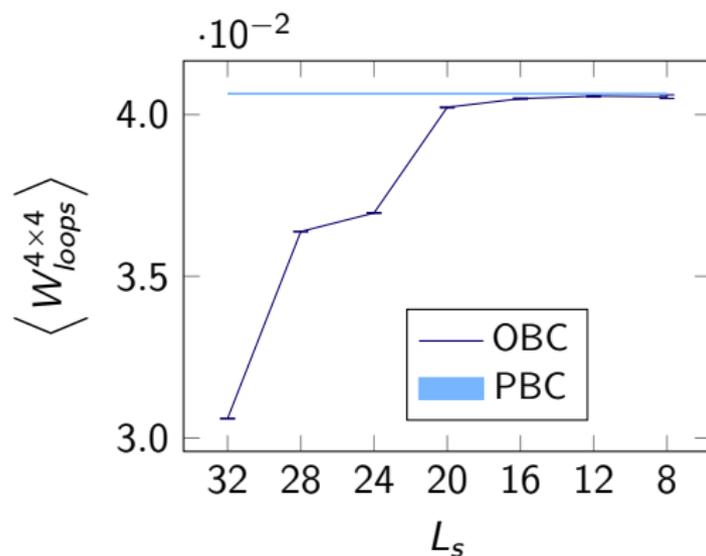

Finite Size Effects

$$V_s = L_s^3$$

$$V'_s = L_s'^3$$

Finite Size Effects

Outlooks: Switching between Boundary Conditions

First Results

Generates higher Q 's

First Results

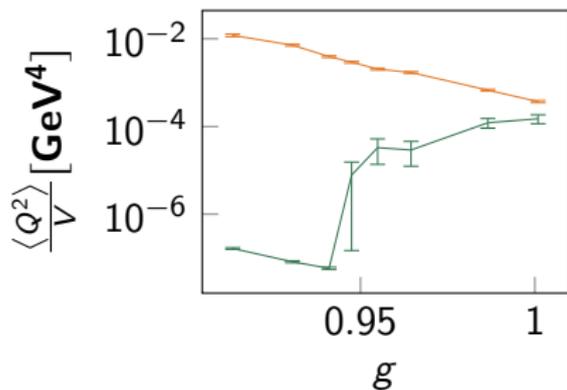

Generates higher Q 's

but

oversamples

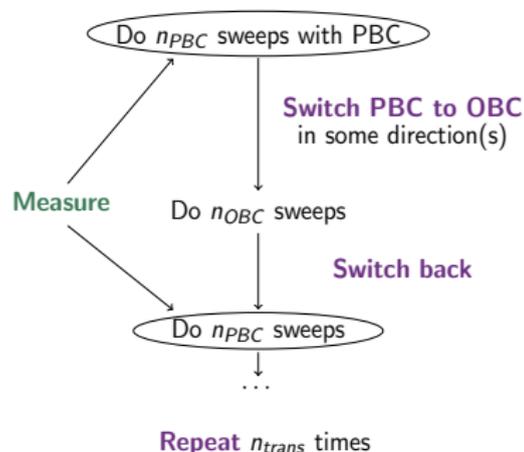

To Sum Up

- ▶ **OBC also solve topological freezing at finite temperature**
- ▶ May use them algorithmically

To Sum Up
